

FY2015 SUSTAINABILITY HIGHLIGHTS

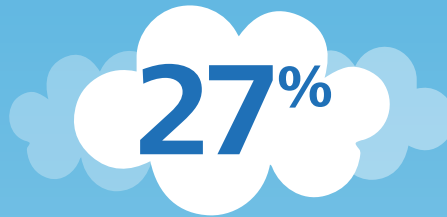

From Epic Challenges to Integrated Solutions

Autodesk Foundation

Launched in 2014, the Autodesk Foundation is the first of its kind to support people and organizations using design to create a better world

Relative CO₂ improvement

Fewer emissions than FY2009, on track with our C-FACT reduction target

LEED certifications

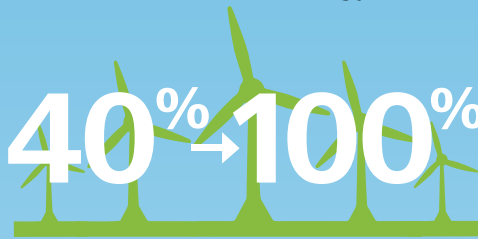

LEED certifications altogether, now covering 32% of our total square footage

Supporting future designers

Students, educators, and institutions we have provided with access to Autodesk software with no fee

Renewable energy

Amount of our global electricity consumption from renewable energy sources and we are committed to powering our business with 100 percent renewable energy

Sustainable design learning

Sustainable design education course hours completed since 2013

Health and wellness

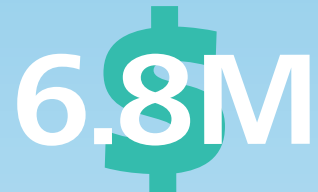

Number of employees who participated in a virtual race around the world that encouraged physical activity and team building

Community involvement

Amount our employees donated in volunteer time and money to nonprofits, which Autodesk boosted with \$901,000 in matching funds

Software for nonprofits

Value of software donated through our Technology Impact Program to support nonprofit organizations using design to solve epic challenges
