

# Increase productivity, flexibly resource projects, boost creativity.

Discover the 7 benefits of highly effective design collaboration

Extraordinary design often requires collaboration across project teams that supports efficient decision-making. But design teams face three key challenges:

1. Projects take too long, with too much 'dead' time.
2. Slow and limited information sharing across internal design teams caused by geographical distance. External teams exacerbate the issue.
3. Project delays and cost overruns caused by no unified communication protocol between disciplines.

With BIM 360 Design, internal and external architecture and engineering design teams are able to work together more closely and communicate directly with one another in real-time via the cloud, leading to increased productivity, flexible resourcing and more.

## 7 Benefits of BIM 360 Design

### 1. Increase efficiency

Enable your team to work faster and more accurately and make decisions wherever they are with easy access to relevant design information.

### 2. Flexibly resource projects

Recruit and build your project team with the best talent, and allow them to work flexibly, no matter their location.

### 3. Make room for creativity

Automate time-consuming tasks, broaden your review team and recruit the right talent to develop extraordinary designs that set you apart.

### 4. Put an end to 'dead' time

Better manage design changes by discipline and reduce time spent waiting for PDF uploads and publishing.

### 5. Eliminate costly errors and delays

Better communicate design intent and manage changes with direct collaboration in the cloud.

### 6. Reduce IT complexity

Remove the need for expensive on-premise solutions and reduce IT overheads by moving to the cloud and scale up or down according to demand.

### 7. Craft a cohesive team

Bring your team together and empower them with the tools to better collaborate on game-changing designs.

“

Using Autodesk BIM 360 Design to collaborate with teams anywhere we are seeing **productivity increases of up to 25%** on cloud-based BIM projects...

Our employees are based all over the country. BIM 360 Design gives us the **flexibility to recruit the best talent** regardless of location.
