# Only One. AutoCAD.
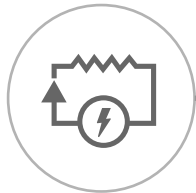

AutoCAD® 2019 including specialized toolsets

Mechanical

700,000+ intelligent manufacturing parts, features and symbols.

Automate generating machine components and creating bills of material.

Architecture

8,000+ intelligent architectural objects and styles.

Automate floorplans, sections, and elevations.

Electrical

65,000+ intelligent electrical symbols for electrical controls systems.

Design panel layouts and schematic diagrams.

Map 3D

Incorporate GIS and CAD data to support planning, design, and data management.

Access spatial data stored in files, databases and web services.

MEP

10,500+ intelligent mechanical, electrical, and plumbing objects.

Design ductwork, electrical conduit, and circuiting for HVAC, plumbing, and electrical.

Plant 3D

Produce P&IDs and integrate into a 3D plant design model.

Create schematic diagrams and plant layouts.

Raster Design

Edit scanned drawings and convert raster images into DWG objects.

Edit, clean up and transform images, manipulate raster entities, and create vector shapes.
