

Your digital journey in 5 steps

Digitising your design & manufacturing business doesn't need to be complicated. While everyone's business and journey will be different, they all involve the following 5 steps. What will your journey look like?

[Click here for more information >](#)

Step 1 Digital Strategy

Typically takes half a day

Use our digital strategy template to explore where your business is today, where it might be in the future and what you need to do to get there.

[Download the template >](#)

Step 2 Innovation workshop & Assessment

Typically takes one day

Explore the key capabilities that drive growth & profitability alongside other business leaders from the industry, and leave with an understanding of what's possible, a personalised assessment of your readiness and how to go about improving it using digital.

[Take our FREE Readiness Assessment >](#)

Step 3 Discovery Meeting

Typically takes one day

One of our industry experts visits you to better understand your business, map out your current processes, identify the bottlenecks and opportunities that digital tools could help you overcome.

Step 4 Recommendations

Typically takes one day

We present our findings and recommendations of the technologies that are most likely to help you achieve your goals, together with a plan on how to move forward.

Step 5 Digital Catalyst

Typically takes about 5 days to find a candidate

To accelerate your implementation, we place a Digital Catalyst, a student expert from a leading UK design & manufacturing university, to help you drive adoption and innovation in the business.
