

Autodesk Exchange for Autodesk® Revit®

FAQ

Frequently Asked Questions

Q1. Does Autodesk provide licensing mechanism?

Q2. Can we use a custom licensing page for EULA (End User Licensing Agreement)?

Q3. I already have my own installer. Can I just publish as is without modifying to bundle structure?

Q4. Screenshot size is listed as 205x120 pixels? Can I make larger images in this proportion and have you scale them?

Frequently Asked Questions

Q5. We can upload more than one screenshot. Will they appear in the store page in the order I submit them?

Q6. There is a section in the submission process labeled as "Commands". Is this relevant?

Q7. There is a section in the submission process called "Installation/Uninstallation": What should be entered here?

Q1. Does Autodesk provide licensing mechanism?

A1. No, we do not. We have a few blog posts about commercial licensing software that might help:

- <http://adndevblog.typepad.com/autocad/2012/08/licensing-applications-infralution.html>
- <http://adndevblog.typepad.com/autocad/2012/09/licensing-applications-crypto.html>

Q2. Can we use a custom licensing agreement?

A2. You cannot customize the licensing agreement shown during the installation. Our suggestion is to display your own agreement on the first launch of the app.

Q3. Can I use my own folder structure for my App?

A3. Unfortunately, you cannot. We mandate that the app's folder structure follow the bundle structure guidelines.

Q4. What screenshot size is appropriate?

A4. Maximum allowed image size 2000 pixels wide x 2000 pixels high.

Q5. Will the screenshots appear in the order in which they were uploaded?

A5. Yes, they should appear on the store page in the order in which it was uploaded.

Q6. Is the “Commands” section in the submission process relevant?

A6. Yes, you can provide details for each ribbon button you create in your app as a separate command.

Q7. What information do we provide in the Installation/Uninstallation section of the submission form?

A7. Since Autodesk creates the installer for you, you could use generic instructions for installation and uninstallation.

Eg: The installer that ran when you downloaded this plug-in from Revit Exchange has already installed the plug-in.

To uninstall this plug-in, exit Revit if you are currently running it, simply rerun the installer by downloading it again from Exchange, and select the 'Uninstall' button, or you can uninstall it from 'Control Panel\Programs\Programs and Features' (Windows 7) or Add/Remove Programs (Windows XP), just as you would uninstall any other application from your system.
