Account Management Product Download

- Once the verification process is complete an Autodesk Revit license or group of licenses will appear in the User's Autodesk Account under All Products & Services (1).
- If issues occur downloading Autodesk Revit from the education website: complete the verification process, login to account management, select the pull-down arrow next to Install (2), & select Download (3).

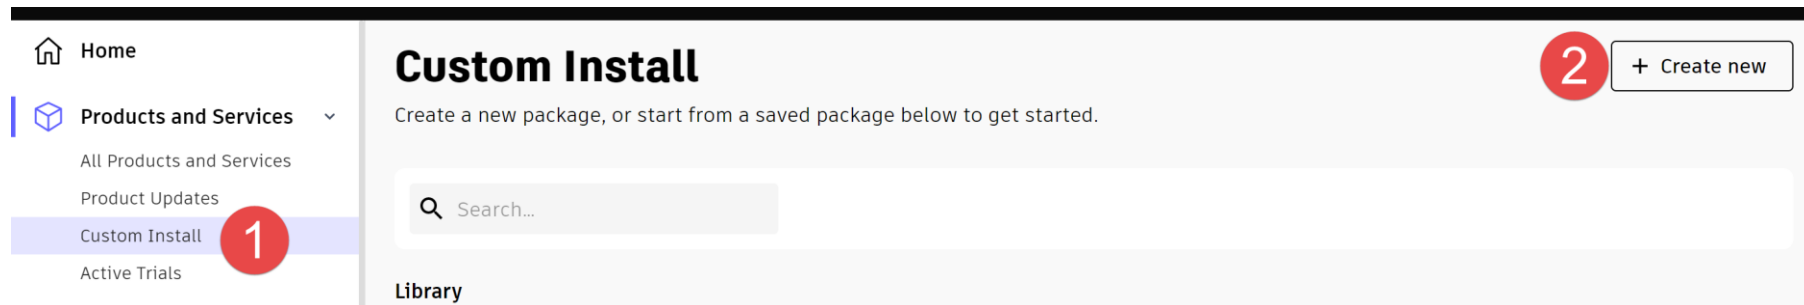

The screenshot displays the Autodesk Account Management interface. On the left, a sidebar contains navigation links: Home, Products and Services (highlighted with a red circle '1'), User Management, Billing and Orders, and Reporting. The main content area is titled 'All Products and Services' and includes a search bar with 'Revit' entered. Below the search bar, it shows '7 items for "Revit"'. Three product cards are visible: 'Cloud Models for Revit', 'Insight - Lighting Analysis for Revit', and 'Revit'. The 'Revit' card shows an 'Install' button with a red circle '2' next to it. A dropdown menu is open next to the 'Install' button, showing 'Download' (with a red circle '3' next to it) and 'Custom Install'.

Custom Install

Use the Custom Install feature in Account Manager to create deployments

- Select Custom Install (1) from the panel on the left side then Create New (2)

Custom Install cont.

- Specify the License Type (1), select one or more products (2).
- Specify the language & version (3).
- You also have the ability so select specific Customizations (4), include Extensions (5), or have the package include Content (6) like the Autodesk Revit Library.
- Click Next (7) when finished.

Custom Install cont.

- Fill out Install settings including Package name, description, deployment path, advanced options, etc.
- Select Save or Download when finished.
- Use the QR code to access step by step instructions

The screenshot shows a web-based configuration interface for creating a custom install package. It is divided into two main panels. The left panel, titled 'Add products' (with a checkmark icon) and 'Install settings' (with a '2' icon), contains several input fields: 'Package name' (containing 'arch'), 'Package description' (containing 'AutoCAD, AutoCAD MEP, Revit 2023'), 'Deployment image path' (containing '\\servername\deployments\adsk-arch'), and 'Deployment log file path' (containing '\\servername\deployments\adsk-arch\log\arch.log'). There are 'Install' and 'Deploy' buttons, with 'Deploy' being active. Below these is an 'Advanced options' section and a checkbox for 'I agree to the Terms of Use'. At the bottom are 'Save' and 'Download' buttons. The right panel, titled 'Package summary', lists the included products: 'AutoCAD' (AutoCAD 2023 0.1 Update 64-Bit), 'AutoCAD MEP' (AutoCAD MEP 2023 English 64-Bit), and 'Revit' (Revit 2023). Each product entry includes a 'What's included' link.

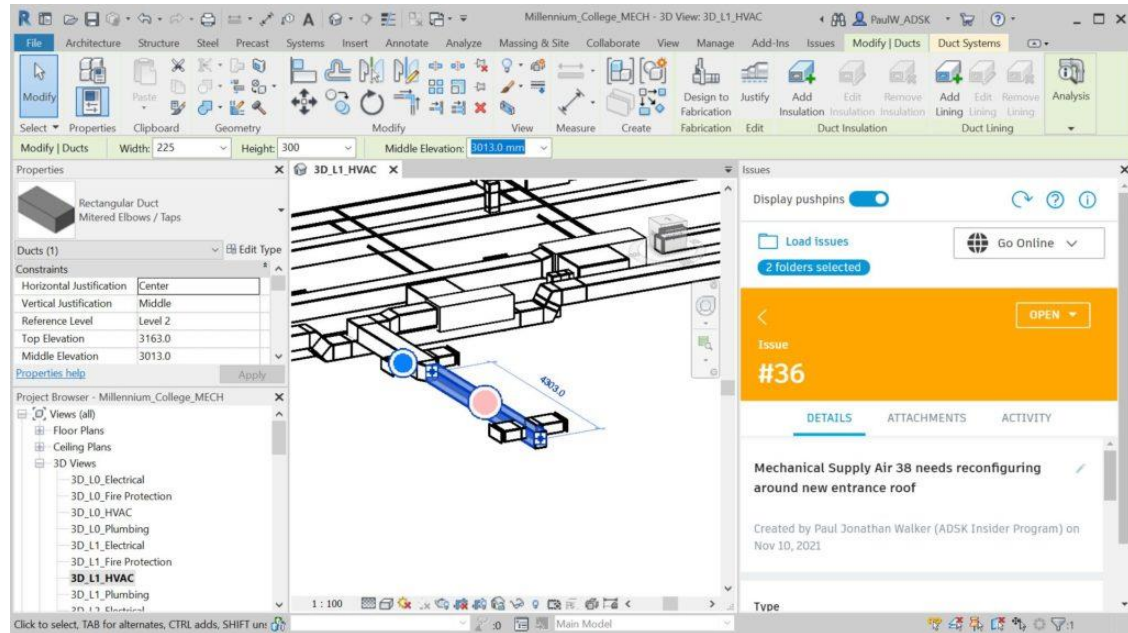

Integrations

Autodesk Revit Issues Add-in

Use the Autodesk Revit Issues Add-in to view and respond to model Issues created in the Autodesk Construction Cloud directly in Autodesk Revit

- To download the Issues add-In, use the [Autodesk Desktop App](#)
- The model needs to be published to Autodesk Docs via [Revit Cloud Worksharing](#), [Cloud Models for Revit](#) or [Desktop Connector](#).
