

## **VPAT™**

# **Voluntary Product Accessibility Template®**

### **Version 1.3**

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. Autodesk provides this information to help our customers understand the accessibility features of this Autodesk product in the context of the Section 508 standards. This was done with the intent to enable agencies to be compliant with the Section 508 regulations. This document is not intended to be a certification of compliance.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

---

**Date:** Monday, July 21<sup>st</sup>, 2016

**Name of Product:** Autodesk® LIVE 1.0

## Section 1194.21 Software Applications and Operating Systems – Detail

### VPAT™

#### Voluntary Product Accessibility Template®

| <i>Criteria</i>   | <b>Supporting Features</b> | <b>Remarks and explanations</b> |
|---|----------------------------|---------------------------------|
| (a) When software is designed to run on a system that has a | Supports with exceptions   | Keyboard navigation is          |

|   |                                 |  |
|---|---------------------------------|--|
| <p>keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.</p>   |                                 | <p>provided for some Menu commands.</p>  |
| <p>(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p> | <p>Does not Support</p>         | <p>Autodesk® LIVE does not generally disrupt or disable the accessibility features of the Windows® operating system. The Narrator does not work for all controls in the Autodesk® LIVE interface, for example icon buttons. Autodesk® LIVE does not support the use of large fonts in most of the interface.</p> |
| <p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>   | <p>Supports with exceptions</p> | <p>Focus is indicated by a white arrow in the window pane, and most buttons and menu items highlight with background shading changes, when in focus. There is no programmatic means to</p>   |

|  |                  |  |
|--|------------------|--|
|  |                  | change the focus.  |
| (d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text. | Does not support | Autodesk® LIVE provides information to the user via the Microsoft® Active Accessibility Application. Not all UI controls are accessible via the Narrator tool. |
| (e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.   | Supports         | Bitmap images and actions associated with them are consistent.   |
| (f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.  | Does not Support |  |
| (g) Applications shall not override user selected contrast and color selections and other individual display attributes.   | Does not Support |  |
| (h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.  | Does not support |  |
| (i) Color coding shall not be used as the only means of conveying  | Supports         |  |

|  |                           |   |
|--|---------------------------|---|
| information, indicating an action, prompting a response, or distinguishing a visual element.   |                           |   |
| (j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.  | Not Applicable            |   |
| (k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.   | Supports                  | Autodesk® LIVE does not use flashing or blinking text.  |
| (l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues. | Supports with exceptions. | Microsoft Active Accessibility applications like the Narrator can be used to access particulars of the components of a form/dialog box. |

***Section 1194.22 Web-based Internet  
information and applications – Detail***

**VPAT™**

**Voluntary Product Accessibility Template®**

| <b>Criteria</b>  | <b>Supporting Features</b> | <b>Remarks and explanations</b> |
|--|----------------------------|---------------------------------|
| (a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).                                     | Not Applicable             |                                 |
| (b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.   | Not Applicable             |                                 |
| (c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.             | Not Applicable             |                                 |
| (d) Documents shall be organized so they are readable without requiring an associated style sheet.   | Not Applicable             |                                 |
| (e) Redundant text links shall be provided for each active region of a server-side image map.  | Not Applicable             |                                 |
| (f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape. | Not Applicable             |                                 |
| (g) Row and column headers shall be identified for data tables.  | Not Applicable             |                                 |
| (h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.             | Not Applicable             |                                 |
| (i) Frames shall be titled with text that facilitates frame identification and navigation  | Not Applicable             |                                 |
| (j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.                                  | Not Applicable             |                                 |

|   |                       |  |
|---|-----------------------|--|
| <p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p> | <p>Not Applicable</p> |  |
| <p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>  | <p>Not Applicable</p> |  |
| <p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>   | <p>Not Applicable</p> |  |
| <p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>                       | <p>Not Applicable</p> |  |
| <p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>   | <p>Not Applicable</p> |  |
| <p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>  | <p>Not Applicable</p> |  |

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web

Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
