	 PLAN	 DESIGN	 BUILD	 OPERATE
<p> AUTODESK Construction Cloud</p> <hr/> <p>DATA PLATFORM</p> <p>Manage all your projects on one unified platform.</p> <p>Tools include BIM Collaborate, Takeoff, Build, and more.</p>	<ul style="list-style-type: none"> • Real-time access to current and historical performance of building assets • Create preliminary budgets and timelines for future developments • Connect project planning and execution teams with data transparency 	<ul style="list-style-type: none"> • Manage the exchange of data, visualize design progress, supercharge collaboration • Automated clash detection and issue management for constructibility • Leverage project data and dashboards to identify trends, mitigate risks and improve decisions 	<ul style="list-style-type: none"> • Connect field and project management workflows with permission-based document control and approvals • Centralized quality and safety issue tracking and transmittal management • Perform construction engineering, conduct scope analysis, and calculate quantities 	<ul style="list-style-type: none"> • A Common Data Environment allows easy handover to asset management system • Access and track your project data to keep your building system running
<p> AUTODESK Architecture, Engineering & Construction Collection</p> <hr/> <p>SOLUTIONS</p> <p>A complete set of tools and workflows for all your design and engineering needs.</p> <p>Tools include AutoCAD, Revit, ReCap Pro, Navisworks, and more. Pair the AEC Collection with partner solutions from Spacemaker and Aurigo.</p>	<ul style="list-style-type: none"> • Capture and digitize as-built conditions • Integrate conceptual design and capital planning to forecast project budgets • Generate feasibility studies with intelligent, outcome-based site planning 	<ul style="list-style-type: none"> • Draft, annotate, design and coordinate complete 2D geometry and 3D model-based designs • Combine design and construction data into a single model, improving documentation and constructibility • Run 5D analysis, clash detection, design simulation, and coordinate multi-disciplinary design 	<ul style="list-style-type: none"> • Combine design and construction data into a single model • Run 5D analysis, clash detection and design simulation • Manage construction schedules with optimized construction sequencing 	<ul style="list-style-type: none"> • Integrate asset design information with operations processes to reduce maintenance costs. • Improve occupant services and engagement, deliver safer, more secure environments, and optimize workspace utilization. • Gain greater visibility into the carbon usage of your facilities.
<p> AUTODESK Tandem</p>	DIGITAL TWIN			

AUTODESK STRATEGIC ALLIANCE PARTNER

Eptura is a leader in the digital transformation of facilities management tools and insights for data-driven real estate decisions, increased operational excellence, and enhanced employee experience.

“ Archibus and Autodesk's BIM-related products have been at the center of our strategy to bring the project model and asset operations together. ”

- **Takaaki Miyauchi, Senior Manager**
Construction Digital Promotion Department, Daiwa House
