

# AI Transparency Card

## AutoCAD

My Insights: Macro Advisor

### What this AI does

My Insights: Macro Advisor is the advisory engine that helps deliver curated insights. Based on product usage patterns, Macro Advisor recommends macros that automate your most frequent workflows, helping you gain insights as you work.

### Data handling

#### Training data

|               |                           |
|---------------|---------------------------|
| Data types    | Text<br>(common elements) |
| Data sources  | Customer content          |
| Personal data | Not used                  |

#### Customer choice

|                        |          |
|------------------------|----------|
| Feature classification | Standard |
| Choice format          | Turn off |

### Trust & safeguards

|                     |                                                               |
|---------------------|---------------------------------------------------------------|
| Human oversight     | Yes                                                           |
| Built-in safeguards | Encryption, De-identification                                 |
| Known limitations   | Results may vary based on inputs, Not for safety-critical use |

#### Additional transparency

|                   |             |
|-------------------|-------------|
| Model provider    | Autodesk    |
| Primary technique | Transformer |
