

AI Transparency Card

AutoCAD Web

Block Auto-Categorization and Search (Tech Preview)

Description

Block Auto-Categorization and Search automatically analyzes blocks in a drawing, groups them into meaningful categories, and makes them easier to browse. It helps users quickly find, reuse, and manage blocks across large DWG files without manually sorting or naming everything.

Feature information

Feature functionality	Automate, Augment
Model source	Third Party Licensed
Primary technique	Computer Vision

Trust ingredients

User directed feature	Yes
Personal data	N/A (third-party model)
Data source(s)	Third-party trained
Choice format	N/A
Encryption at-rest	Yes
Encryption in-transit	Yes
Other safeguards	N/A
