

Autodesk provides the information in this pursuant to California AB1305 (Voluntary Carbon Market Disclosures) (codified at Section 44475 *et seq.* of the California Health & Safety Code). (Source: https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202320240AB1305). In particular, the information below addresses certain of Autodesk’s climate-change statements, subject to AB1305, as found in the Company’s FY24 (Fiscal Year 24) Impact Report (Source: <https://www.autodesk.com/sustainability/impact-report>) and details about the Company’s reliance on certain Carbon Offsets. Autodesk’s Fiscal Year 2024 Impact Report (covering the period from February 1, 2023, to January 31, 2024) provides the Company’s current position on climate-change issues relevant to AB1305.

Information on Certain Climate-Related Claims In Response to Section 44475.2 of the California Health & Safety Code:

Autodesk set science-based targets to reduce its emissions in line with climate science. Our science-based targets were validated by the Science Based Targets Initiative (SBTi) in Autodesk’s fiscal year of 2021. Our public commitment is as follows: “Autodesk commits to reduce absolute scope 1 and 2 GHG emissions 50% by FY2031 from a FY2020 base year. Autodesk also commits to reduce scope 3 GHG emissions from purchased goods and services, fuel and energy-related activities, business travel, and employee commuting 55% per dollar of gross profit over the same timeframe. Autodesk commits that 26.5% of its suppliers by emissions covering purchased goods and services and business travel, will have science-based targets by FY2027. Autodesk commits to continue annually sourcing 100% renewable electricity through FY2031.” (Source: <https://sciencebasedtargets.org/companies-taking-action#dashboard>, *search Autodesk for the public claim). Autodesk does not employ a specific sector methodology other than an absolute reduction target on our Scope 1 and 2 emissions and an economic intensity target per dollar of gross profit for our Scope 3 emissions. Autodesk internally collects impact data from relevant sources and calculates its annual emissions with results tracked in our annual Impact Report (Please see page 12 and 90 of the [FY24 Impact Report](#) for reference).

For the residual emissions that were not reduced under our validated target, Autodesk purchases carbon offsets to neutralize these emissions per metric ton of carbon equivalents (MTCO₂e) and is independently verified by our third-party assurance provider (Please refer to section (b) below for reference).

(b) Whether there is independent third-party verification of the company data and claims listed.

Autodesk verifies its greenhouse gas (GHG) data and carbon offsets using third party verification. Please see [third party verification statements for FY24](#).
