What this AI does

As an extension of Live Action and Live Action Easy, user can increase the visual quality of a CG character by enhancing the lighting, compositing, and performance realism of 3D results in 2D space.

Data handling

Training data

Data types	N/A (third-party model) (common elements)
Data sources	N/A (third-party model)
Personal data	N/A (third-party model)

Customer choice

Feature classification	Standard
Choice format	Always on

Trust & safeguards

Human oversight	No
Built-in safeguards	Encryption
Known limitations	Results may vary based on inputs, Not for safety-critical use

Additional transparency

Model provider	Third-party
Primary technique	Diffusion Transformer (DiT)
