

AI Transparency Card

Forma

AI Rendering

What this AI does

Generates architectural visualizations from Files in Forma Data Management, with rendering style specified through prompts (e.g. photorealistic, watercolor). Users capture a design view and receive a render-like image in seconds. Users can review results, iterate with different styles, or download directly in Forma Board.

Data handling

Training data

Data types	N/A (third-party model) (common elements)
Data sources	N/A (third-party model)
Personal data	N/A (third-party model)

Customer choice

Feature classification	Standard
Choice format	Always on

Trust & safeguards

Human oversight	Yes
Built-in safeguards	Encryption
Known limitations	Results may vary based on inputs, Not for safety-critical use

Additional transparency

Model provider	Third-party
Primary technique	Diffusion Transformer (DiT)
