

AI Transparency Card

Maya

Machine Learning Deformer

What this AI does

Helps customers speed up character animation by locally creating a single deformer based on one or more deformers from their own data. The generated model approximates complex deformations, enabling faster playback and more interactive editing. Customer content and the resulting machine learning model remain local to the customer's environment.

Data handling

Training data

Data types	Geometry (common elements)
Data sources	Customer content
Personal data	Not used

Customer choice

Feature classification	Standard
Choice format	Turn off

Trust & safeguards

Human oversight	Yes
Built-in safeguards	Encryption, On-device processing
Known limitations	Results may vary based on inputs, Not for safety-critical use

Additional transparency

Model provider	Autodesk
Primary technique	Predictor
