LEARN MORE ABOUT BIM IN THE ERA OF CONNECTION: WWW.ERAOFCONNECTION.COM
AUTODESK CONNECTS YOUR FUTURE WITH INTEGRATED WORKFLOWS ACROSS THE LIFECYCLE OF BUILDINGS AND INFRASTRUCTURE.

What's changing? Everything!

Nature of Demand

- In the U.S., 93% of owners (public and private sector) will require or encourage BIM on new projects.
- In the U.K., 68% of owners (public and private sector) will require or encourage BIM on new projects.
- BIM adoption in North America grew from 28% to 71% between 2007 and 2012.
- Studies predict that more than 50% of information technology will move to the cloud within the decade.

Characteristics of Products

- AutoCAD ® debuts in 1981. There are approximately 19.3 million CAD users worldwide.
- AutoCAD ® is now used worldwide by a wide range of industries.
- AutoCAD ® allows for the real-time display of design, movement of the link to the line.
- It supports the creation, analysis, and management of design information.
- The introduction of AutoCAD ® for mobile applications enhances the productivity of any project.

ERA OF DOCUMENTATION

- The invention of AutoCAD ®.
- With AutoCAD ®, we can see the links between data.
- By 1986, there are approximately 10,000 AutoCAD ® users in the U.S.
- We can share drawings through geometry, diagrams, and text for the first time.

ERA OF OPTIMIZATION

- The acceleration of BIM.
- Positive impact on the environment.
- At least one kind of product that has a positive impact on the environment.
- At least one kind of product that has a positive impact on the environment.
- Eco-friendly construction should be encouraged.

ERA OF CONNECTION

- The introduction of 3D printing.
- Minimize barriers, reduce waste, and improve quality.
- Interconnected design-build BIM processes help connect projects.
- The digital universe will grow 50 times, year-over-year, in the next decade.
- Smart city technologies.

ERA OF OPTIMIZATION

- The acceleration of BIM.
- Positive impact on the environment.
- At least one kind of product that has a positive impact on the environment.
- Eco-friendly construction should be encouraged.

ERA OF DOCUMENTATION

- The invention of AutoCAD ®.
- With AutoCAD ®, we can see the links between data.
- By 1986, there are approximately 10,000 AutoCAD ® users in the U.S.
- We can share drawings through geometry, diagrams, and text for the first time.

ERA OF OPTIMIZATION

- The acceleration of BIM.
- Positive impact on the environment.
- At least one kind of product that has a positive impact on the environment.
- Eco-friendly construction should be encouraged.

ERA OF CONNECTION

- The introduction of 3D printing.
- Minimize barriers, reduce waste, and improve quality.
- Interconnected design-build BIM processes help connect projects.
- The digital universe will grow 50 times, year-over-year, in the next decade.
- Smart city technologies.

ERA OF DOCUMENTATION

- The invention of AutoCAD ®.
